Professional Summary

Software Engineer with 1+ year of experience specializing in Mobile Development (Flutter) and Backend Systems (Golang). Proven track record in building scalable microservices and high-impact enterprise mobile apps. Adept at transforming business requirements into high-performance technical solutions using Clean Architecture and managing complex Monorepo environments to serve tens of thousands of active users.

Work Experience

PT. HNI (Halal Network International) | Mobile Developer

Nov 2025 - now

- Architected a scalable mobile ecosystem for Halmall and HNI.id using Flutter, reducing code redundancy by 40% through a Monorepo (Melos) structure.
- Contributed to the deployment and optimization of the HNI.id app, successfully supporting 10,000+ downloads and achieving a stellar 4.9/5 rating on the Google Play Store.
- Engineered type-safe data layers using Freezed and Cubit, decreasing potential runtime crashes and improving app stability across multiple applications.
- Integrated 15+ REST API endpoints using Dio with custom interceptors, ensuring secure (JWT) and reliable data transactions for nationwide logistics routing.

PT. Naruma Sekar Perdana | IT Developer (Project-Based)

Sep 2025 - Dec 2025

- Engineered a full-stack Home Care system using Golang microservices and Flutter, ensuring seamless data synchronization.
- Built idrusaljufri.com (Next.js) from scratch, managing full SDLC to achieve a 90%+ Lighthouse score.
- Translated business needs into technical specs, reducing development turnaround time by 20% via effective communication.

PT. Airtel Technology Indonesia | Mobile Apps Developer (Project-Based)

Mar 2025 - Aug 2025

- Collaborated on the Warranty Smart Indonesia mobile app, translating UI/UX designs into pixel-perfect Flutter code with 100% fidelity.
- Integrated 20+ RESTful API endpoints to ensure secure data synchronization between mobile and backend services.
- Partnered with QA teams to conduct rigorous testing, resolving 30+ critical bugs prior to deployment and ensuring a crash-free rate of 99%.

VOCASIA.ID | Mobile Developer Intern

Sep 2024 - Feb 2025

- Led the end-to-end mobile development of the Vocasias e-learning platform, successfully deploying the MVP to Google Play Store.
- Optimized app performance by implementing efficient state management, reducing load times by 25% for course video playback.
- Built critical features including course enrollment and real-time progress tracking to support user acquisition targets.

Technical Skills

- Languages: Dart, Go (Golang), Python, PHP, Next.js, Kotlin, SQL.
- Mobile Development: Flutter, Android Native, iOS (Basic).
- State Management & Architecture: Cubit/BLoC, Provider, Clean Architecture, Monorepo (Melos).
- Backend & Tools: REST API, Firebase, Docker, Git, Figma, Postman.

Education

Universitas Pembangunan Nasional Veteran Jakarta

Aug 2022 - Jul 2025

Information System Major, GPA : 3.83/4.00
